

# DATA ANALYTICS WITH IBM COGNOS

## SMARTINTERNZ EXTERNSHIP

<b>DATE</b>	23 October 2023
<b>EXTERNSHIP TITLE</b>	Data Analytics With Ibm Cognos Analytics
<b>PROJECT NAME</b>	Depression: A CommonMental Disorder

### ***TEAM MEMBERS***

**Name:** Maddala Mahiyah

**Email ID:**

mahiyah.21bec7214@vitapstudent.ac.in

**Registration Number:**

21BEC7214

**Name:** Shaik Henna Yasmine

**Email ID:**

henna.21bec7206@vitapstudent.ac.in

**Registration Number:**

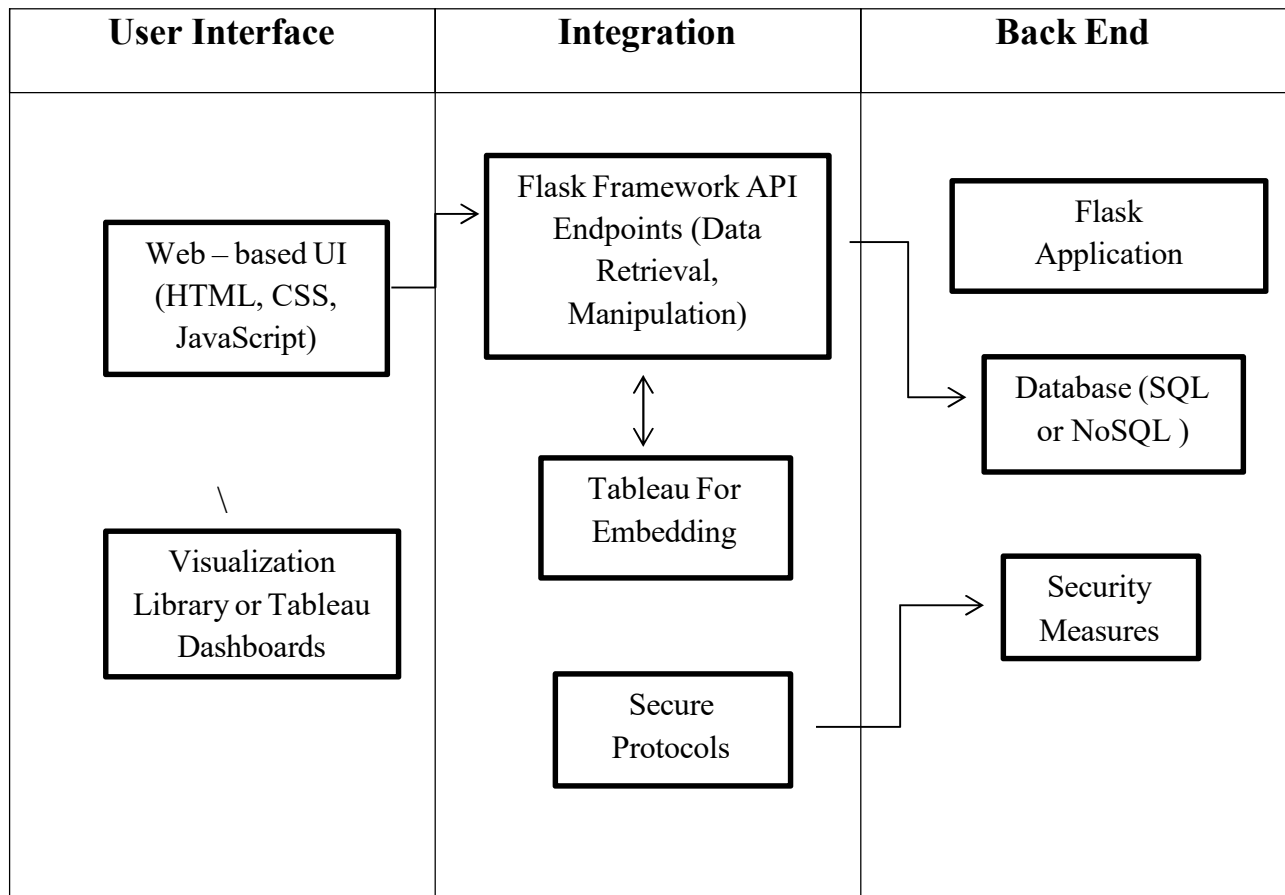

21BEC7206

## Project Design Phase-II

### Technology Stack (Architecture & Stack)

#### Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

**Table-1: Components & Technologies:**

<b>Component</b>	<b>Description</b>	<b>Technology</b>
<b>User Interface</b>	Front-end layer for user interaction	HTML, CSS, JavaScript
<b>Web – Based UI</b>	User interface designed for web browsers	Responsive design frameworks (e.g., Bootstrap)
<b>Visualizations Library</b>	Library for rendering interactive visualizations	Tableau
<b>Tableau Dashboards</b>	Integrated dashboards for data analysis and visualization	Tableau
<b>Tableau Integration</b>	Embedding visualizations and dashboards within the UI	Tableau JavaScript API, Tableau Server
<b>Back End</b>	Handles data processing, storage, and serves as a bridge between the UI and data sources	Database (e.g., SQL or NoSQL)
<b>Flask Application</b>	Back-end server for processing requests and serving data	Flask
<b>Database</b>	Stores and retrieves data securely	MySQL, NoSQL
<b>Security Measures</b>	Implementation of security protocols for data protection	HTTPS, Authentication, Authorization

**Table-2: Application Characteristics:**

<b>Characteristic</b>	<b>Description</b>	<b>Technology</b>
<b>User Interface Design</b>	Intuitive design for user interaction and engagement	HTML, CSS, JavaScript
<b>Responsiveness</b>	Ensuring optimal user experience across devices	Bootstrap
<b>Performance</b>	Efficient data processing and rendering	Performance optimization techniques, Caching
<b>Integration</b>	Seamless communication between components	API (Application Programming Interface)
<b>Analytics</b>	Gathering insights from user interactions and system usage	Analytics tools (Tableau)
<b>Security</b>	Protection of data and user authentication	HTTPS, Encryption, Secure protocols
<b>Data Storage</b>	Stores user responses and predefined feedback messages	MySQL
<b>Usability</b>	User-friendly design and intuitive interface	User testing, UI/UX design principles
